b) Therapy planning

Goal setting and therapy planning by trainees

independently

with assistance from internship supervisor

is not provided

c) Implementation of therapy

Implementation of individual occupational therapies by trainees

independently without supervision by the internship supervisor

independently under supervision and possibly with assistance from the internship supervisor

take over parts of the case history under the supervision of the internship supervisor

observe the taking of anamnesis

is not planned

Implementation of occupational therapy group therapies by trainees

independently without supervision by the internship supervisor

independently under supervision and possibly with assistance from the internship supervisor

take over parts of the case history under the supervision of the internship supervisor

observe the taking of anamnesis

is not planned

d) Evaluation

Writing of initial/intermediate and final occupational therapy reports by the trainee

independently

with assistance from internship supervisor

is not provided

FH KREMS  
UNIVERSITY OF APPLIED  
SCIENCES / AUSTRIA

Compilation of occupational therapy progress documentation by trainee

independently

with assistance from internship supervisor

is not provided

**7. Requirements for the trainee**

Requirements for mental resilience:

very high                      high                      medium                      low

Description of the stressful factors:                      [Click or tap here to enter text](#)

Requirements for physical resilience:

very high                      high                      medium                      low

Description of the stressful factors:

Language skills:

English:

absolutely required                      would be an advantage                      not required

German:

absolutely required                      would be an advantage                      not required

Further languages:

absolutely required                      would be an advantage                      not required

Practical experience:

not necessary                      desirable                      at least 1 internship  
already completed

Vaccinations/immunity certificate:

Proof of vaccination/immunity is required:                      yes                      no

If yes, against what diseases?
